Boston, MA

[linkedin.com/in/connorch](https://www.linkedin.com/in/connorch)

Technical Skills

JavaScript (ES7), PHP, Dart, HTML5, CSS3, React, Vue.js, Angular, Flutter, React-Native, Redux, GraphQL, Koa, Node/Express, MongoDB, SQL, Redis, Memcached, D3, jQuery, SASS, Webpack, Gulp, Perl, AWS ECS

Professional Experience

Acornpack, *Principal Software Engineer*

Feb 2020 - Present

B2B Initiative

- Architect Koa and SQL backend, design UI, and lead initiatives for an upcoming B2B interface.
- Increase cash flow by streamlining the Vue.JS UI and lowering the barrier-to-entry for users.

Wayfair, *Software Engineer*

January 2018 - February 2020

Promotions Team

- Create several features using JavaScript and PHP to provide an immersive UX and drive millions in sales.
- Implement tools with React, PHP, and MSSQL to manage sale events, promotions, and all coupon codes.
- Design GraphQL APIs for selective and predictable data transfer.
- Drive initiatives to improve Speed Index by 700ms via React and PHP performance improvements.
- Leverage Redux for accessible data storage across an extensive React frontend.
- Manipulate complex datasets using SQL Server, Redis, Memcached for reduced storage latency.

athenahealth, *Software Engineer*

June 2017 - October 2017

Reporting Experience and Internal Data Product Teams

- Create microservice Express app with connection to monolithic Perl backend for intuitive and secure navigation between analytics tools.
- Build out React app with Redux, CSS Modules, and SASS for efficient and scalable development of team.
- Design analytics tool with Angular to drive data transparency for over 1,000 active users.
- Capture data with SQL to track usage of over 100,000 users across athenahealth products.

Software Engineering Projects

Chow, *Software Engineer*

iOS, Android, and Web meal-ordering app designed to assist restaurants affected by COVID-19

- Create native iOS, Android, and Web apps using Flutter framework for cross-platform development.
- Design and build beautiful map UI and order flow for simple and intuitive user experience.
- Build data models and architecture for interactions between Flutter and Firebase.

Journey, *Software Engineer*

Web and Alexa powered journal and psychoanalysis tool

- Build RESTful API with Node, Express, and a relational DB for extensibility and maintainability.
- Create interactive visualizations of NLP results with D3 and React for fast rendering and easy analysis.
- Implement authentication with OAuth for secure management of persistent user sessions.

Education

Hack Reactor, *Advanced Software Engineering Immersive Program*

2016

SUNY Buffalo, CS courses in Python, Java, JavaScript, and Data Structures

2015 - 2016

Case Western Reserve University, BA in Psychology, Honors

2011 - 2015

Personal

I am an expert skier, world traveler, and fluent Spanish speaker. In Argentina I traversed the Andes mountains, rode galloping horses, and ate ferociously hot peppers. Experiences like that one, living in Spain for 6 months, and exploring Europe, India, Australia, and Peru have sculpted the adventurous person I am today.
